

Survey Plan Checklist **(ALTA, Record of Survey)**

Survey plans submitted with permits should contain the following information as applicable. Either an ALTA or Record of Survey are acceptable for the permitting process and it is not necessary to have both. However, these requirements may vary by permit (check your permit requirements).

- An ALTA (American Land Title Association) survey, when required, should meet the minimum standard detail requirements for ALTA/NSPS (National Society of Professional Surveyors) Land Title Surveys. These requirements can be found on-line at nsps.us.com and other web sites. Note that required information is not governed by La Paz County and may change over time. Registered Land Surveyors are generally knowledgeable on ALTA survey requirements.

- A Record of Survey requirements are covered by State minimum requirements, or Arizona Minimum Standards of Practice for Boundary Surveys. These standards can be found under Arizona Revised Statutes and other websites. Note that required information is not governed by La Paz County and may change over time. Registered Land Surveyors are generally knowledgeable on Record of Survey requirements.
